Summary

Sustainable Architect with 5+ years delivering residential and commercial work from schematic design to CDs. Trained at Politecnico di Torino (M.Sc. Sustainable Architecture). Strengths in passive strategies, vernacular materials (rammed earth, bamboo), and client-facing visualization. Partnered with MEP/structural to cut energy use across projects and turn concepts into buildable details for timely approvals. Open to EU roles.

Core Skills

- **Sustainable Design:** Passive cooling/heating, envelope optimization, shading/daylighting, vernacular materials
- **Tools/Tech:** AutoCAD, SketchUp, Enscape, Lumion, Adobe Photoshop/Lightroom, hand drafting, model making
- **Architecture & Delivery:** Schematic design, design development, construction documentation, site coordination
- **Collaboration:** Cross-discipline coordination (MEP, structural), vendor management, stakeholder communication
- **Visualization:** Photorealistic rendering, presentation boards, perspective sketching, storyboard creation

Experience

Do My Homes

June 2025 – Present

Architectural Consultant

Chennai, Tamil Nadu

- Ensure designs are compliant with building codes, zoning laws, and local regulations for residential and commercial projects.
- Conduct on-site visits to inspect ongoing construction, ensuring adherence to plans and resolving field issues promptly.
- Oversee projects from initial concept through construction, coordinating with clients, contractors, and consultants to maintain design quality.
- Collaborate with engineering teams to integrate sustainable and functional design solutions aligned with client goals.

Grid Studio

August 2021 – January 2025

Project Architect

Vellore, Tamil Nadu, India

- Led multi-unit residential/mixed-use from schematic to DD, aligned space programs to codes to secure timely approvals.
- Applied passive strategies (shading, massing, cross-ventilation) with AutoCAD/SketchUp to optimize envelope performance.
- Coordinated RFIs with MEP/structural to eliminate rework and maintain on-time handovers for 5+ active projects.
- Built client-ready renders/decks in Enscape/Lumion to accelerate buy-in and shorten decision cycles by 30%.

The Sacred Groves

June 2016 – May 2017

Design Intern

Auroville, Tamil Nadu

- Supported eco-resort concepts using rammed earth/bamboo, articulated design intent for stakeholder approvals.
- Produced 15+ presentation boards and curated material palettes to communicate finishes and construction logic.
- Documented bamboo joinery options and site analyses to inform constructability and reduce on-site change orders.

Projects

Eco-Resort Concept (Rammed Earth) | Role: Designer

- Defined concept narrative and wall systems in SketchUp/Photoshop, clarified materiality and structural approach.
- Integrated passive cooling/shading principles into massing to improve comfort and reduce modeled cooling demand.
- Delivered presentation boards enabling stakeholder alignment and concept sign-off within the first review cycle.

Residential Block (Passive Shading) | Role: Lead Designer

- Modeled facade shading strategies in AutoCAD/Enscape to mitigate heat gain while preserving daylight quality.
- Specified envelope elements and ventilation paths, documented details for build feasibility and cost alignment.
- Produced visuals and notes that reduced redesign iterations and kept approvals on schedule for stakeholders.

Education

Politecnico di Torino	2019 – 2021
<i>M.Sc., Sustainable Architecture</i>	<i>Italy</i>
Anna University	2013 – 2018
<i>Bachelor of Architecture (B.Arch)</i>	<i>India</i>

Certifications & Workshops

- Rammed Earth Construction
- Bamboo Jointing Systems
- Earth Concrete Formulation
- Digital Fabrication

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Working Proficiency (B1, learning)
