Dear Hiring Manager,

I'm applying for Sustainable Architect roles in Germany/EU where passive strategies, code-compliant detailing, and crisp client communication drive timely approvals and energy-efficient outcomes. With 5+ years across residential and mixed-use projects and an M.Sc. in Sustainable Architecture from Politecnico di Torino, I bring hands-on experience from schematic design through construction documentation (CDs), paired with a practical, materials-first approach using rammed earth, bamboo, and other low-impact envelopes.

At Grid Studio, I led multi-unit concepts to design development, aligning space programs with local codes to accelerate permits and reduce redesign cycles. I applied passive cooling/daylighting (massing, cross-ventilation, shading) and coordinated closely with MEP/structural to cut rework and keep 5+ concurrent projects on schedule. My client-facing renders and decks (AutoCAD, SketchUp, Enscape/Lumion, Adobe) consistently shortened decision loops—improving buy-in and keeping delivery predictable. Earlier at The Sacred Groves (Auroville), I supported eco-resort concepts using rammed earth/bamboo, documenting joinery and constructability to minimize on-site changes.

I'm comfortable translating sustainability intent into buildable details: envelope optimization, shading devices, and ventilation paths tied to cost and constructability, with clear RFIs and issue logs for contractors. I partner well with engineering teams to integrate energy-saving design choices early, and I maintain clean CDs for smoother site execution and inspections. Tools include AutoCAD, SketchUp, Enscape, Lumion, and Adobe Suite; I also present well to stakeholders with storyboarded visuals and concise technical notes.

I am EU-ready, learning German at B1 level, and open to relocation and travel. I would welcome the opportunity to discuss how my passive-design depth, vernacular-materials experience, and client-ready visualization can support your next residential or mixed-use brief. Thank you for your time and consideration.

Sincerely,

Abishek Vijayan
