Dear Hiring Manager,

I am a non-clinical healthcare operations professional with 6+ years improving home-health service delivery and intake. I specialize in clinician scheduling, patient onboarding, payer coordination, and regulatory compliance, and I'm confident I can help your team stabilize day-to-day operations while lifting patient experience and documentation quality.

At Ecorgy Solutions (NeoGenCare, CA), I coordinated daily clinician–patient schedules across ambulatory home-health, standardized EMR task queues and escalation rules, and reduced backlog by 15–20% with better handoffs and SLAs. By tightening follow-ups and case notes, I supported a 3–5% month-over-month rise in satisfaction signals. As Intake Team Lead, I introduced checklists and SOPs that raised first-pass data accuracy by 10–12% and prevented authorization delays by 10–15% through earlier eligibility checks. Across both roles I tracked practical KPIs, maintained audit-ready documentation, and coached teammates on tone, privacy, and workflow discipline.

I work comfortably in EMR environments, intake queues, and KPI dashboards, and I'm diligent about HIPAA-aligned practices, payer authorizations, and documentation accuracy. My background includes cross-team communication with clinicians and coordinators, consistent service recovery, and clear escalation notes that keep care on-track. I'm recognized as a Top Performer (Silver 2022; Gold 2023) and earned a 2024 appreciation certificate tied to monthly visit billing volume—reflecting reliable throughput and documentation hygiene.

I am open to relocation within Germany and adaptable to EU documentation rigor. With English (full professional proficiency) and working German (elementary, learning), I'm eager to contribute to a patient-centric, compliant, and efficient operation. I would welcome the opportunity to discuss how my experience in scheduling, intake, and quality documentation can support your organization's care standards and growth.

Thank you for your time and consideration. I would welcome the opportunity to discuss how I can optimize clinician scheduling, reduce intake rework through early payer checks, and keep EMR queues audit-ready to lift patient experience.

Sincerely,
Abhijith MS Nair
