Dear Hiring Manager,

I am writing to express my interest in quality assurance and food safety roles in Germany. With 5+ years of experience across bakery, flatbreads, ambient foods and fresh produce in the United Kingdom and India, I manage HACCP-based systems, CCP monitoring and audit preparation for high-volume plants. My goal is to apply this line-level, audit-ready experience in a German environment working with GFSI-aligned standards such as BRC, IFS or FSSC 22000.

Most recently at LT Foods in Harlow, I worked as a Quality Assurance Auditor for ambient and heat-and-eat rice lines. I ran internal audits against HACCP, GMP and BRC requirements, reviewed CCP records on the shop floor and raised clear non-conformities with realistic CAPA actions. By tightening X-ray verification checks and holding stock until results met expectations, I helped cut repeat non-conformities by around 20% and improved first-time release performance.

At Gail's Bakery in London, the focus was protecting food safety and product quality from raw material intake through cooling and dispatch. I monitored HACCP and CCP records, challenged gaps during shifts and supported operators to correct issues immediately. Work on foreign body and underbake complaints sharpened my approach to traceability and root-cause analysis. I coordinated hand and environmental swabs, managed calibrations for gas analysers, pH meters and A.W meters, and supported pest control, hygiene walks and GMP audits for BRC and SALSA readiness.

Earlier at Signature Flatbreads, I safeguarded flatbread and tortilla lines through failsafe checks on metal detectors and X-ray units, verification of weight and pack integrity, and control of label codes using Bartender, Logo Pack and Axiom. Intern and production roles in airline catering and fresh produce packing strengthened discipline around hygiene, allergen control, temperature management and traceability under time pressure.

Relocating to Germany is a long-term commitment for me, and I am keen to further develop my German language while supporting a site that prioritises HACCP, CCP control, GMP, traceability and continuous improvement. Thank you for considering my application. I would welcome the opportunity to discuss how my background in food safety and audits can support your quality objectives in Germany.

Sincerely,

Sai Charitha Kavuri
