Dear Hiring Manager,

I am applying for Ship Cook / Galley Lead roles in Germany. I bring 10+ years of end-to-end galley operations across offshore support vessels, tugboats, crew boats, and general cargo ships. I deliver safe, multi-cuisine service aligned to HACCP and STCW, with disciplined CCP temperature logging, deep-clean schedules, and MARPOL-compliant waste practices. I am certified in STCW Basic Safety Training, STSDSD, BOSIET, H2S, and Advanced Food Safety & Hygiene, with valid CDC, SID, and ILO Medical.

In recent rotations with OSM Thome and AG Maritime, I owned meal service for crews of 15–25 on shifting watches, coordinating port provisioning, balanced menu cycles, and allergen labeling. I standardised FIFO/FEFO stock rotation, thermometer checks, and sanitizer thresholds to maintain audit-ready hygiene and zero non-conformities. I work calmly in heavy seas, align service windows to bridge and engine schedules, and maintain reliable hot holding and plating standards.

Operationally, I use simple Excel trackers for inventory, cost per person, and rostered cleaning to improve predictability and control waste. On multiple vessels I reduced overproduction by 10–15% through batch prep, portion control, and demand-based adjustments, while keeping variety and nutritional

balance for multi-national crews. I also train galley assistants in hygiene, color-coded prep, and knife safety to improve handovers and consistency at scale.

I am available for sea-going or shore-based industrial catering environments and can relocate to Germany. I am committed to German HACCP documentation standards and LMIV allergen practices, and I am prepared to complete any additional local onboarding or medical checks. I would welcome the opportunity to discuss how my offshore discipline, hygiene compliance, and crew-first service mindset can support your operations.

Sincerely,

Dhineshkumar Chandrasekaran
