Dear Hiring Manager,

I am writing to express my interest in the Data Analyst / BI Developer position at your organization. With 5 years of experience in data and business intelligence across engineering services and healthcare analytics, I specialize in building reliable, executive-ready Power BI solutions integrated with Microsoft Fabric and Azure Data Factory.

In my current role at Ramboll, I partner with finance and operations leaders to translate objectives into actionable dashboards and governed data pipelines. My recent projects improved decision-making speed by 20%, enhanced dataset reliability by 25%, and stabilized scheduled refresh to a 99% success rate using ADF/Fabric pipelines. I also bring hands-on expertise in SQL, DAX, Power Query (M), and dimensional modeling, supported by my **Microsoft Certified: Fabric Data Engineer Associate (DP-700)** credential.

What excites me about your company is its focus on data-driven transformation and scalable analytics. I am confident that my experience in building secure, auditable, and performance-optimized BI solutions, combined with my collaborative approach and proficiency in English (C1) and German (B1), aligns well with your vision.

I would welcome the opportunity to contribute to your team's success and discuss how my skills can support your analytics roadmap.

Sincerely,

Bhuvanesh Samidurai
