Summary

Data Engineer & Test Automation Specialist with 6+ years of experience driving aviation maintenance and supply chain analytics. Strong expertise in SQL and Python for ETL/ELT validation, data modeling, workflow automation, and end-to-end data quality assurance. Experienced in AWS-based ecosystems and modern data platforms, including Snowflake. Proven ability to design and automate test frameworks, validate complex data pipelines, and ensure high standards of data reliability. Skilled in building impactful Power BI dashboards that enhance operational visibility and support faster decision-making.

Core Skills

- | | | |
|--|--|--|
| • Data Engineering: SQL, Python, Data Warehousing | • Data Quality & Testing: Source-to-Target Validation, Reconciliation, Regression Testing | Dashboards, Operational Analytics |
| • Automation Framework: Python-Selenium, Pytest, TestNg | • Cloud & Platforms: AWS EC2, AWS S3, Snowflake | • Domains: Aviation MRO, Flight Maintenance, Supply Chain, Inventory Management |
| • Tools & Delivery: Git, GitHub, JIRA, Service Desk | • BI & Reporting: Power BI, Executive | |

Experience

Ramco Systems (Aviation Clients: National Jet Express, Leidos, China Southern) **June 2019 – Present**

Senior Systems Analyst *Chennai, India / Adelaide, Australia*

- Own data validation and reporting accuracy for aviation EAM & automation framework across maintenance and supply chain.
- Build SQL checks, Python utilities for ETL reconciliation, cross-module integrity, and defect triage.
- Cut reporting defects by 30% through tuned validations and automated quality gates on large datasets.
- Deliver Power BI and SSRS dashboards plus AWS release support, lifting planner turnaround by 15%.

Projects

Automated Data Validation Framework | Location: Chennai / Remote **2019 – Present**

- Developed an **automated SQL and Python-based data validation framework** covering null, range, transformation, and Source to Target checks for aviation datasets.
- **Reduced manual QA effort by 30%** by implementing reusable, parameterized test packs and scalable validation modules.
- Integrated the framework into **AWS and CI/CD pipelines**, enabling automated nightly data quality checks and faster release cycles.
- Improved data reliability by standardizing **reconciliation scripts, defect logs, and root-cause tracking**, enhancing BI and ETL release confidence.

National Jet Express | Location: Adelaide / Remote

2019 – Present

- Managed technical support and server maintenance for National Jet Express across production, test, and simulation environments and coordinated supply chain and inventory management, ensuring operational efficiency.
- Automated flight maintenance scheduling workflows, improving compliance and reducing turnaround time.
- Managed and maintained AWS cloud servers across production, test, and simulation environments, ensuring high availability and system reliability (NJE).
- Designed and deployed SQL-driven data pipelines for real-time operational reporting and integrating data from multiple aviation modules.

Education

KCG College of Technology

May 2015 – May 2019

B.E. Information Technology

Chennai, India

Sai Matriculation Higher Secondary School

May 2013 – May 2015

Higher Secondary (XII)

Chennai, India

Certifications

- Intel College Excellence Program - Intelligent Systems
- Oracle Academy - Java Fundamentals
- Datacamp - Introduction to Python
- CodeBind Technologies - Android and Web Development

Awards

- **Customer Champion Award (2021)** for client support excellence and high-quality incident resolution.
- Recognized for knowledge transfer and cross-team collaboration on aviation BI rollouts.

Languages

- English – Full Professional Proficiency (C2)
- German – Intermediate Working Proficiency (B1)
