Summary

Identity & Access Management Engineer with 10+ years of experience across identity lifecycle, SSO, federation, and privileged access for large enterprises. Specialises in IBM Security Verify Access, ISAM, ISIM, IGI, Okta, with hands-on work in RBAC, SoD, password vaulting and directory integration. Delivers secure onboarding of applications, high-availability setups, daily IAM operations for healthcare, retail, and insurance environments. Collaborates with security, infrastructure, and audit teams to stabilise authentication flows and improve compliance alignment across multi-system estates.

Core Skills

- **Identity & Access:** Identity lifecycle, SSO, federation, MFA, session control, access policies
- **Directories & Data:** Active Directory, LDAP, DB2, CSV connectors, bulk load, replication
- **Governance & RBAC:** Role mining, RBAC models, SoD rules, access reviews, entitlement governance
- **Automation & Scripting:** REST APIs, shell scripts, health checks, runbooks, monitoring workflows
- **Platforms & Tools:** IBM ISVA, ISAM, ISIM, IGI, PIM, ESSO, Okta, Tivoli Directory Integrator
- **Security & Domains:** ISO 27001 controls, third-party risk, healthcare IAM, retail IAM, audit support

Experience

IBM

July 2019 – Present

Security Consultant – Identity & Access Management

Chennai, India

- Own end-to-end configuration and support of IBM Security Verify Access and PIM for healthcare and insurance clients.
- Configure junctions, access policies and LDAP/DB2/TDI integrations across QA and production clusters.
- Design and maintain ISPIM high-availability setups with member nodes and replication for continuous privileged access.
- Improve SSO stability and privileged access uptime by nearly 30% while cutting manual password resets by about 40%.

Tata Consultancy Services (TCS)

September 2015 – June 2019

System Engineer – Cyber Security Practice (IAM Developer)

Chennai, India

- Delivered IAM solutions using ISIM, IGI, ISAM, PIM for enterprise clients in retail and consumer-facing domains.
- Executed top-down and bottom-up role mining to define business and IT roles mapped to entitlements and target systems.
- Reduced access conflicts and manual provisioning effort by nearly 20% through RBAC models and SoD-aware policies.
- Migrated applications from TAM 6 to ISAM 7 by creating WebSEAL junctions, ACLs, POPs, and coordinating tests.

Key Client Projects

Retail Business Services – RBAC in ISIM (TCS)

July 2018 – June 2019 — Chennai, India

- Led RBAC implementation in ISIM for a large US retail client to standardise access across core store applications.
- Performed role mining using access data to define IT and business roles with mapped entitlements and target systems.
- Reduced SoD conflicts and duplicate entitlements by nearly 20% and improved audit readiness for access reviews.
- Maintained user identity data in ISIM to keep accounts, profiles, and access mappings aligned with HR events.

Retail Business Services – IGI Implementation & Governance (TCS) **May 2018 – June 2018** — **Chennai, India**

- Installed and configured IGI with directory, database, mail, and identity brokerage components for governance rollout.
- Onboarded applications and organisational structures using bulk data load and defined admin and application roles.
- Implemented lifecycle flows from user load through account creation, role publication, and visibility controls.
- Built workflows and email notifications so owners could approve or decline role assignments in time-bound cycles.

Cleveland Clinic Abu Dhabi – Privileged Identity Manager (IBM) **July 2019 – August 2020** — **Chennai, India**

- Configured IBM PIM for caregivers to secure privileged IDs through automated password rotation and safe checkout.
- Created shared access roles and provisioning policies to link user identities with required privileged accounts.
- Improved privileged access control and reduced misuse risk by enforcing centralised workflows and policy rules.
- Managed both the admin console and self-service portal to support daily PIM operations and user experience.

Arkansas Blue Cross and Blue Shield – ISVA Implementation (IBM) **September 2020 – Present** — **Chennai, India**

- Configure ISVA policies, junctions, and integrations with backend applications for a large insurance environment.
- Perform monitoring and tuning of ISVA components to maintain high login success and stable SSO performance.
- Create and maintain implementation runbooks for test and production cutovers to reduce deployment risks.
- Coordinate with client, infrastructure, and security teams to resolve incidents and align changes to governance.

Certifications & Training

- Okta Training Series – Centralised IAM with Okta, user management, APIs, MFA, security policies, SAML, OIDC, AD integration and advanced features.
- IBM Security Access Manager V9.0 Deployment Professional – configuration, access control, federation and operational deployment.
- Hands-on vendor training on ISAM 9.0, including foundation, advanced access control and federation scenarios.

Education

Pondicherry Engineering College **2013 – 2015**

Master of Technology in Information Security (CGPA: 8.55 / 10) *Puducherry, India*

Pondicherry University **2009 – 2013**

Bachelor of Technology in Computer Science (CGPA: 8.3 / 10) *Puducherry, India*

Achievements

- Recognised by TCS leadership for achieving more than 95% customer satisfaction across multiple IAM project phases.
- Appreciated by IBM clients and leadership for successful go-lives of IAM solutions in complex production environments.

Languages

- English – Full Professional Proficiency (C1)
