Dear Hiring Manager,

I am a People Operations professional with 3+ years of experience across HR operations, payroll coordination, HRIS hygiene, and onboarding. I build predictable, compliant processes that reduce manual work, keep records audit-ready, and improve the day-to-day experience for employees and managers. I am looking forward to relocating to Germany and bringing DACH-ready practices with a strong focus on documentation accuracy and GDPR-aligned handling of employee and candidate data.

In my most recent role at Geneminds Study Solutions LLP, I standardized SOPs and introduced HRIS-driven templates and checklists that cut manual administration by about 30%. I improved payroll inputs by tightening attendance and leave capture, enabling 100% on-time, error-free payroll. I also created lightweight dashboards for attendance and exceptions that gave leaders faster visibility and sped routine approvals.

Previously at UPSKI International, I owned full-cycle payroll and personnel records with audit-ready accuracy, mediated grievances to improve survey scores by roughly 1%, and designed pre-boarding kits that shortened joining lead time. Earlier at Leadz Study Abroad, I coordinated hiring for multiple openings end-to-end, stabilized payroll inputs through cleaner attendance reporting, and ensured zero compliance exceptions during offer and contract administration.

I work hands-on with GreytHR, Google Sheets and Docs, and MS Excel and Word, and I quickly pick up new HRIS or ATS tools. My approach is practical and data-aware: define the policy, document the workflow, measure the outcome, and iterate. I am comfortable partnering with leadership on policy standardization, employee relations, and change adoption while maintaining clear, respectful communication.

I would welcome the opportunity to contribute to your People Operations team and to help strengthen compliant processes, improve onboarding and payroll accuracy, and raise service levels for employees and managers. Thank you for your time and consideration.

Sincerely,

Ancy Raj
