Dear Hiring Manager,

With 9+ years in food safety and quality across spices and ingredients for EU and US markets, I am interested in Food Safety and Compliance roles in your organisation in Germany. My experience covers building and maintaining audit-ready FSMS, HACCP controls, and documentation systems that support safe, compliant, and efficient operations. Having worked with export-focused plants, I understand the expectations of international customers and retailer standards. I am also actively learning German (A2 level) to integrate faster into German teams and daily work.

In my current role as Assistant Manager QA/QC, I lead BRCGS Issue 9 and FSSC 22000 internal audits, supplier assurance, and pest management programmes. Day to day responsibilities include CCP verification, allergen controls, traceability exercises, recall drills, and change control and deviation handling. I use SAP S/4HANA QM for specification governance, complaint handling, and release decisions so that product, label, and process requirements stay aligned. I also work closely with external laboratories and service providers to keep methods, data integrity, and evidence aligned with certification expectations.

Earlier, I managed calibration and readiness for UV-Vis, HPLC, GC, and ELISA systems, helped pass certification audits without critical findings, and developed methods for oleoresins with clear acceptance limits. These roles strengthened my focus on documentation integrity, sampling plans, and traceable COAs. At Nedspice I helped lift surveillance compliance to the high 90s and reduced repeat complaint categories through structured RCA, 5-Why and fishbone analysis, and disciplined CAPA ownership

with SLAs. This combination of lab exposure, plant QA/QC, and system-level governance helps me connect daily checks to audit and regulatory outcomes.

I would be glad to bring this mix of FSMS governance, audit leadership, and SAP QM experience to a German manufacturer that values robust controls and continuous improvement. I am comfortable training production and QC teams, coordinating cross-site stakeholders, and building practical SOPs and KPI dashboards that support safe, stable, and on-time release. I look forward to the opportunity to discuss how I can support your food safety, certification, and regulatory goals in Germany.

Sincerely,

Freddy Joseph
