Summary

Solution Architect with 16+ years across enterprise Java, microservices and API-led modernisation. Designs DDD-aligned REST services, hardens security with OAuth2 and sets CI/CD guardrails. Uses APM insights to reduce MTTR and improve reliability for insurance and public-sector platforms. Works with product, infrastructure and security to ship features predictably in Agile teams across EU-style enterprise environments.

Core Skills

- **Architecture:** DDD, Microservices, REST, Eventing, Design Patterns
- **APIs & Security:** OAuth2.0, OpenAPI, Apigee, JWT
- **Observability:** Dynatrace, Splunk, Grafana, Prometheus
- **Java/Spring:** Java 8-21, Spring Boot, Spring Data, Spring Batch, JUnit, Mockito
- **CI/CD & Quality:** Jenkins, UCD, Maven, Nexus, SonarQube, Fortify
- **Data/Platforms:** Oracle, SQL Server, MongoDB, WebLogic, Tomcat

Experience

MASDR Data Solutions

January 2025 – Present

Solution Architect

Riyadh, Saudi Arabia

- Architect Spring Boot microservices for policy platforms and set coding and test standards to lift release quality and stability.
- Design OAuth2 and Apigee shared-flow patterns so channels reuse common auth, cutting integration defects and security incidents.
- Define CI/CD gates with Jenkins, UCD, SonarQube, Fortify and Nexus IQ and tune via Dynatrace to lower latency and MTTR.

MASDR Data Solutions

May 2023 – December 2024

Application Service Architect

Riyadh, Saudi Arabia

- Architected domain models and OpenAPI contracts with DDD to enable reuse across online, mobile and field-office journeys.
- Delivered S3-backed file services for registration and benefits that removed manual handling and reduced operational overhead.
- Codified JUnit and Mockito scope and owned CI/CD on Jenkins and UCD, cutting regressions and speeding consumer onboarding.

Tata Consultancy Services

November 2017 – May 2023

Java Architect

Chennai, India; Riyadh, Saudi Arabia

- Led monolith-to-microservices migration, building Spring Boot REST services on Oracle and OSB/BPM/JMS for core insurance flows.
- Set up CI/CD, quality gates and APM dashboards with UCD, Jenkins, SonarQube, Fortify and Dynatrace to improve MTTR and uptime.

*Lead Java Developer**Chennai, India*

- Delivered full-stack features using Java, EJB, Hibernate and RCP UI, exposing REST and SOAP services to core policy systems.
- Executed SQL tuning, ETL and production support, driving RCAs and controlled hotfixes to keep key batch windows on track.

Projects

OpenRewrite Spring Migration – MASDR Data Solutions

Riyadh, Saudi Arabia

- Designed OpenRewrite-based migration to standardise Spring upgrades and cut manual edits across microservices portfolios.
- Defined base frameworks and CI/CD quality rules so new services meet security and reliability criteria from first release.

Elastic Search Enquiry Services – MASDR Data Solutions

Riyadh, Saudi Arabia

- Built enterprise enquiry services with Apache Camel, Kafka and Elasticsearch to centralise search and reduce response times.
- Delivered channel-agnostic APIs and tuned via Dynatrace and structured logs to stabilise performance under peak demand.

Ameen Application Migration – GOSI

Riyadh, Saudi Arabia — 2017 – 2023

- Modernised Ameen from legacy Java to Spring, Angular and DDD for back office, online channels and government-entity feeds.
- Modelled enrolment and benefit flows for unemployment, retirement, hazard and heir pensions and automated month-end payouts.

PAS Migration – SANLAM

Cape Town, South Africa — 2009 – 2017

- Migrated legacy UK-built policy system to Epsilon with RCP client, EJB backend and MS SQL while preserving screens and flows.
- Coordinated data and process migration to keep agent journeys intact and reduce manual corrections on migrated policies.

Education

Anna University

2005 – 2008*B.E. in Electronics & Communication Engineering**Chennai, India*

Languages

- English — Full Professional Proficiency (C1)
- German — Elementary Working Proficiency (A2, learning)
