

VINITHA PUKAZH BAGYA R

Bangalore, India (Open to relocate to Germany)

☎ +91 7339586277 ✉ vinithapukazhbagyar@gmail.com  [Vinitha Pukazh Bagya R](#)

Summary

Full-stack developer with 7+ years of experience building scalable web applications and cloud-native systems. Strong expertise in microservices architecture, API integrations, and infrastructure automation using Terraform. Proven ability to optimize system performance, reduce manual effort through engineering-driven automation, and strengthen application security. Experienced in designing backend services and developing efficient, production-ready solutions in agile environments.

Core Skills

- **Back-End Development:** Python, NodeJS, Flask, Express, Java, Spring Boot, Groovy
- **Databases & ORM:** PostgreSQL, MySQL, DynamoDB, BigQuery, SQLAlchemy ORM
- **Front-End Development:** React, TypeScript, JavaScript, HTML, CSS, Bootstrap, D3.js
- **DevOps & Tools:** Git, GitHub, TeamCity, CircleCI, Jenkins
- **Cloud & Infrastructure:** GCP (Google Cloud Platform), Docker, Kubernetes, Terraform
- **Testing & Security:** Pytest, Mocha, Sinon, MagicMock, Selenium, Okta (Identity Provider)

Experience

Guidewire

August 2024 – Present

Software Engineer III

Bengaluru, India

- Design and implement AI-assisted automation for release workflows using backend services and agent-based systems, reducing manual release effort by 30% and improving deployment reliability.
- Maintain and enhance backend services supporting release engineering pipelines, improving system traceability and operational efficiency.
- Automate CI/CD build processes by integrating pipeline enhancements, streamlining deployment workflows and reducing manual intervention.
- Collaborate with cross-functional teams to improve release stability, system performance, and developer experience across environments.
- Collaborate on front-end integrations using React to support release workflow visibility and improve developer experience.

Thoughtworks

February 2021 – August 2024

Senior Consultant (Application Developer)

Bengaluru, India

- Develop event-driven systems integrating Workday with internal applications using Node.js and React, enabling real-time data synchronization and eliminating manual updates.
- Engineer backend optimization solutions using Python and cloud infrastructure, reducing API processing time from 1 hour to under 20 minutes.
- Design and implement microservices-based compensation platform with asynchronous processing, improving system efficiency by 20%.
- Automate data validation workflows for 3,000+ records across platforms using Python and BigQuery, reducing manual effort by 75%.
- Lead infrastructure automation using Terraform and implement security improvements through threat modeling and vulnerability remediation across GCP environments.
- Build and enhance front-end interfaces using React and TypeScript to improve user experience and accessibility of enterprise applications.

- Develop backend systems for online course purchases using Groovy and Grails, integrating PayU and PayPal to enable secure transactions and increase conversion rates by 20%.
- Design and implement gamified programming modules, increasing user engagement by 30% through interactive learning features.
- Build data visualization dashboards using D3.js to monitor user performance and learning analytics for educational platforms.
- Integrate third-party services including Google Maps and Zoom APIs to enhance platform functionality and user experience.

Education

Sri Eshwar College of Engineering**2014 – 2018***Bachelor of Engineering in Computer Science and Engineering**India*

Additional Information

- Quickly adapted to new technologies by transitioning from Groovy/Grails to Python microservices within the first month at Thoughtworks; currently expanding expertise in AWS and Kubernetes.
- Mentored 6+ junior developers through code reviews and knowledge sharing, improving team productivity and engineering best practices.

Languages

- English – Full Professional Proficiency (C1)
- German – Basic Proficiency (A2)
