Summary

Senior Quality Engineering leader with 13+ years of experience driving large-scale quality transformation across complex enterprise and financial systems. Expertise in AI-driven testing, Generative AI validation, and advanced AI/ML techniques including LLM evaluation and prompt engineering. Proven ability to design scalable automation and validation platforms across UI, API, and data layers using microservices and modern engineering stacks. Strong focus on DevOps and CI/CD-driven delivery models to enhance release efficiency and system reliability. Experienced in leading global teams and aligning quality strategy with business-critical outcomes.

Core Skills

- **QA Leadership & Strategy:** QA Leadership, Test Strategy, End-to-End Test Planning and Execution, Release Management, Defect Prevention, Quality Governance, Risk Management, Engineering Leadership, Global Team Management, Stakeholder Management
- **AI-Driven Testing:** Generative AI, Agentic AI, MCP Integration, RAG Pipelines, Prompt Engineering, LLM Evaluation, Hallucination Detection, AI-powered Test Automation, Embeddings, U.S. Patent
- **Automation & DevOps:** Test Automation Framework Development, Selenium WebDriver, Playwright, Rest Assured, BDD (Cucumber), Continuous Testing, CI/CD Integration, Jenkins, Docker, GitHub Actions, Git, Gradle, Maven, Test Data Management
- **Engineering & Platforms:** Java, Python, JavaScript, Spring Boot, FastAPI, Microservices Architecture, REST APIs, AWS, Teradata, DB2, MongoDB, SQL Server, Data Validation, Financial Services (BFSI), Wealth Management, Regulatory Compliance

Experience

Morgan Stanley

March 2022 – Present

Director / Senior Manager

Mumbai, India

- Lead end-to-end engineering delivery for Wealth Management Client Reporting platforms across global teams by managing distributed delivery across India and North America, improving release coordination efficiency by 20%.
- Architect a Generative AI-based validation platform using Python (FastAPI), Spring Boot microservices, and React, enabling scalable PDF processing and improving validation throughput by 30%.
- Design an Agentic AI-driven QA automation framework using MCP integration with Jira and GitHub to generate BDD test cases and validate code alignment, reducing manual triage effort by 30%.
- Improve document validation accuracy by reducing false positives by 80% through advanced AI-based validation models and structured quality controls.
- Optimize team structures and delivery workflows by aligning resources and implementing continuous improvement practices, increasing team productivity by 15%.

Infosys

March 2018 – November 2021

SDET (Test Analyst)

Pune, India

- Develop a BDD-driven automation framework using Cucumber for unified UI and API testing, improving test coverage and consistency by 25%.
- Execute complex data validation workflows using MongoDB, Parasoft SOATest, and Python scripting to ensure data integrity across distributed systems.
- Collaborate with development and DevOps teams to support environment readiness across Dev, QA, Staging, and Production, improving deployment reliability by 20%.
- Enhance automation efficiency by integrating reusable test components and improving framework scalability across projects.

Mindtree	November 2013 – March 2018
<i>Test Engineer</i>	<i>Pune, India</i>
• Execute functional and automation testing across enterprise applications by validating UI, API, and backend systems, improving defect detection efficiency by 20%. • Develop and maintain automated test scripts using Selenium and Java to support regression cycles and reduce manual testing effort by 25%. • Collaborate with cross-functional teams to analyze defects and ensure timely resolution, improving release quality and stability. • Support test planning, execution, and reporting by maintaining structured documentation and test artifacts aligned with SDLC processes.	

Mphasis	March 2009 – August 2010
<i>Transaction Analyst</i>	<i>Pune, India</i>
• Process financial transactions and validate data accuracy by following compliance-driven workflows, ensuring audit readiness and operational accuracy. • Perform transaction reviews and discrepancy analysis by applying financial controls, improving data accuracy by 15%. • Collaborate with internal teams to resolve processing issues and maintain service quality within defined SLAs.	

Education

Scaler Neovarsity	December 2024 – September 2026 (Expected)
<i>M.Sc. in Computer Science</i>	<i>Mumbai, India</i>
Swami Ramanand Teerth Marathwada University	July 2010 – September 2013
<i>B.E. in Computer Science</i>	<i>Maharashtra, India</i>

Patents

- U.S. Patent: Innovative Disclosure Document Evaluation and Compliance System and Method

Certifications

- AWS Certified Solutions Architect – Associate (Issued Jan 2021 — Expires Jan 2024)
- Professional Scrum Master I (PSM I) – Scrum.org
- ISTQB Foundation Level Tester

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Proficiency (B1)
