Dear Hiring Manager,

I am writing to express my interest in **Cloud Operations or Infrastructure Engineering** opportunities within your organization. With over 4 years of experience in virtualization, backup systems, and cloud infrastructure, I bring strong expertise in VMware environments, enterprise backup solutions, and cloud platforms such as Azure and AWS.

In my current role at **LTIMindtree**, I manage backup and disaster recovery operations using Commvault and Veeam, ensuring secure data protection across enterprise systems. I have configured file-level, VM-level, and database backups, improved recovery readiness, and optimized retention policies to reduce storage overhead while maintaining compliance. My work focuses on ensuring high availability, data integrity, and operational continuity in critical environments.

At **Brennan IT**, I work as a **Cloud Operations Engineer**, where I provision, migrate, and optimize virtual machines across VMware environments, improving system performance and resource utilization. I actively monitor infrastructure health, troubleshoot VM performance issues, and resolve replication and backup failures, reducing incident resolution time and enhancing system reliability. My experience in managing disk utilization and infrastructure efficiency has contributed to stable and scalable operations.

Earlier in my career at **ESDS Software Solution**, I built a strong foundation in backup management and Windows server administration. I configured Commvault solutions, improved backup success rates, and implemented high-availability and failover clustering solutions to enhance uptime and business continuity.

I am particularly interested in opportunities in Germany, where organizations emphasize robust infrastructure, system reliability, and cloud-driven operations. With my hands-on experience in virtualization, backup and disaster recovery, and cloud infrastructure, along with my intermediate German proficiency, I am confident in my ability to contribute effectively to cross-functional teams in a global environment.

I would welcome the opportunity to discuss how my experience in cloud operations, system optimization, and infrastructure reliability can support your organization's IT and cloud strategy.

Thank you for your time and consideration.

Sincerely,

Yash Manoj Patil
