Summary

Data Analyst with 2+ years of experience delivering business insights through data analysis, visualization, and predictive modeling. Strong expertise in Power BI, Python, and ETL pipeline development for scalable analytics solutions. Skilled in cloud platforms, containerized environments, and automation frameworks using Docker and Terraform. Experienced in building production-ready data workflows, integrating REST APIs, and enabling data-driven decision making across industrial and operational environments.

Core Skills

- **Cloud & DevOps:** Terraform, GitHub Actions, Docker
- **Programming & Data Processing:** Python (Pandas, NumPy), Scikit-learn, Automation Scripting, SQL (Joins, Aggregations, Queries)
- **Machine Learning & AI:** Machine Learning Algorithms (Regression, Classification, Clustering), Model Training & Evaluation, Feature Engineering, Data Preprocessing, Predictive Analytics, Natural Language Processing (NLP)
- **Data Engineering & ETL:** Data Cleaning, Data Transformation, Data Validation, ETL Workflows, Automation
- **Business Intelligence & Analytics:** Power BI, Power BI Service, Power Automate, DAX Programming, KPI Reporting, Data Visualization, Dashboard Development, Performance Monitoring, Data Analysis
- **Integration & Tools:** REST APIs, Roboguide, LLM Integration

Experience

Magna Steyr

December 2023 – Present

Data Analyst

Pune, India

- Develop automated pipelines for synthetic data generation using Python and simulation tools, improving machine learning model training accuracy by 40%.
- Enhance data quality and diversity by implementing structured data processing and validation workflows to support predictive analytics models.
- Maintain and monitor containerized applications using Docker to improve system reliability and deployment efficiency across analytics environments.
- Build automated ETL pipelines and integrate REST APIs to enable seamless data flow and reduce manual data processing activities.
- Design interactive Power BI dashboards to visualize industrial data, track operational KPIs, and automate reporting workflows by integrating multiple data sources.

Magna Steyr

July 2023 – November 2023

Machine Learning Intern

Pune, India

- Develop and deploy test automation frameworks using Large Language Models including BERT, LLaMA, and LangChain to reduce manual testing effort by 40%.
- Implement Python-based automation scripts and integrate REST APIs to streamline testing workflows and improve execution efficiency.
- Optimize automation pipelines by applying machine learning models and testing frameworks to enhance validation accuracy.
- Collaborate with engineering teams to design scalable automation processes supporting production-ready implementations.

Projects

Employee Competency Analytics Platform

Power BI, Power Apps

- Architected an end-to-end analytics solution using Power BI and Power Apps, centralizing skill data for 640+ employees.
- Designed KPI frameworks for competency gap analysis improving workforce planning accuracy by 70%.
- Automated data validation and ETL workflows reducing manual HR reporting effort by 40%.

Operational Workforce Monitoring System

Power BI, SQL, ETL Pipelines

- Developed real-time Power BI dashboards tracking utilization, attendance, and productivity KPIs across departments.
- Engineered automated multi-source ETL pipelines reducing reporting latency by 35%.
- Built optimized DAX measures and star schema data models to enhance query performance and analytical depth.

Vehicle Performance Analytics Dashboard

Power BI, Data Modeling

- Integrated multi-source vehicle test datasets into a unified analytical model for performance benchmarking.
- Implemented trend analysis and anomaly detection visualizations accelerating issue identification by 25%.
- Automated report refresh and deployment via Power BI Service ensuring consistent real-time insights.

Education

Guru Nanak Khalsa College of Arts Science & Commerce

2017 – 2020

Bachelor of Science in Physics

India

Certifications

- Business Intelligence Analysis
- Machine Learning and Deep Learning
- Power BI for Data Analysis
- Advanced Excel
- Agentic AI

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Proficiency (B1)
