Dear Hiring Manager,

I am writing to express my interest in **biotechnology, laboratory, or biopharmaceutical** roles within your organization. With over 11 years of combined academic and practical experience in molecular biology, pharmaceutical practices, and applied biotechnology, I bring a strong foundation in laboratory techniques, process understanding, and regulatory compliance.

My background in **biotechnology**, supported by hands-on experience in PCR, HPLC, gel electrophoresis, and microbial processes, has enabled me to develop a structured and research-oriented approach to problem-solving. During my early career, I worked on biodiesel production from plant-based sources and contributed to laboratory research focused on sustainable and scalable solutions. These experiences strengthened my understanding of bioprocess engineering, enzyme kinetics, and experimental design.

In my recent role as a **Pharmacist at Elite Hospital & Child Care Centre**, I have been responsible for managing high-volume pharmaceutical operations while ensuring strict adherence to GMP and GDP standards. I have handled inventory management, regulatory compliance, and patient safety processes, while collaborating closely with healthcare professionals to support treatment outcomes. This role has enhanced my attention to detail, documentation accuracy, and ability to work within regulated environments.

Additionally, as a **Co-Founder of Agri-Bio Innovations**, I applied biotechnology principles to develop a sustainable biopesticide and conducted field trials to validate its effectiveness. This entrepreneurial experience strengthened my ability to translate scientific knowledge into practical, real-world applications.

Germany represents an ideal environment for advancing my career, given its leadership in biotechnology research, pharmaceutical innovation, and strong regulatory frameworks. With my **B1-level German proficiency** and technical background, I am motivated to contribute to research-driven teams and further develop my expertise in molecular biotechnology and biopharmaceutical development.

I would welcome the opportunity to discuss how my skills and experience align with your organization's goals. Thank you for your time and consideration.

Sincerely,

Ashutosh Dwivedi
