Dear Hiring Manager,

I am writing to express my interest in a Supply Chain or Inventory Analyst position within your organization. With over three years of experience spanning luxury retail and manufacturing operations, combined with a Master's degree in International Business and Supply Chain Management from Oxford Brookes University, I bring strong analytical capability, ERP expertise, and hands-on operational experience aligned with modern European supply chain environments.

In my recent role as an **Inventory Controller at Gucci**, United Kingdom, I led end-to-end inventory governance across retail and back-of-house operations. By leveraging SAP ERP, structured cycle counting, and reconciliation controls, I improved stock data accuracy by 30% and reduced shrinkage by 10% through detailed root cause analysis and corrective action planning. Managing over 1,000 SKUs, I optimized warehouse-to-shop-floor replenishment processes to enhance product availability and reduce operational delays. This role strengthened my ability to operate in high-value, fast-paced environments where precision and data-driven decision-making are critical.

Previously, as a **Design and Manufacturing Engineer at CYTOS** in India, I managed material flow, production scheduling, and ERP-based tracking systems to improve logistics transparency and process efficiency. Through Lean workflow optimization and bottleneck analysis, I reduced logistics delays by 20% and improved overall process efficiency by 30%. This experience provided me with a strong foundation in manufacturing logistics, cross-functional coordination, and operational risk mitigation.

Technically, I am proficient in **SAP ERP, Oracle ERP, and MS Dynamics 365**, along with advanced Excel, SQL, and Power BI for KPI reporting, dashboard development, and analytical modeling. I am particularly interested in roles that integrate data analytics with operational execution, supporting demand planning, replenishment, and S&OP processes.

With B1-level German proficiency and openness to relocation, I am motivated to contribute to Germany's advanced manufacturing and retail supply chain landscape. I am confident that my analytical mindset, structured approach to inventory control, and international exposure will allow me to deliver measurable value to your team.

I would welcome the opportunity to further discuss how my background aligns with your organizational goals. Thank you for your time and consideration.

Yours sincerely,
Omkar Kalokhe
