Experience

Standard Chartered

March 2021 – Present

Lead Business Analyst / Delivery Manager

Bangalore, India

- Led MX2.11 platform decommissioning and migration by transitioning treasury workflows to strategic platforms reducing legacy risk exposure across trading operations.
- Owned end-to-end requirements lifecycle by translating business needs into structured functional documentation improving build accuracy and reducing rework by 20%.
- Delivered trade lifecycle automation enhancements across confirmations and settlement workflows reducing manual intervention by 25%.
- Established RAID governance framework improving risk visibility and preventing delivery escalations across cross-functional teams.
- Directed Agile delivery execution and UAT strategy for treasury and regulatory workflows enabling stable releases and improved cross-team alignment.

Société Générale

March 2017 – March 2021

Senior Business Analyst

Bangalore, India

- Gathered and structured business requirements for FX and Money Market platform migrations ensuring consistent interpretation across global development teams.
- Led consolidation of legacy reporting systems into a centralized platform improving data consistency and reducing reconciliation effort by 30%.
- Delivered regulatory implementations for Volcker and MiFID by embedding compliance rules within trading system workflows.
- Collaborated with Risk and Compliance teams to implement automated control validations reducing operational risk exposure.
- Facilitated stakeholder workshops and release walkthroughs aligning business and technology teams and minimizing late-stage requirement changes.

EdgeVerve

January 2016 – January 2017

Senior Functional Consultant

Bangalore, India

- Led end-to-end implementation of treasury management systems from requirement workshops through production Go-Live ensuring alignment with business workflows.
- Coordinated SIT and UAT cycles by validating system functionality and preventing operational disruptions during release cycles.
- Delivered structured user training and post-Go-Live stabilization support enabling smooth operational transition and rapid system adoption.
- Collaborated with development teams using JIRA, Confluence, and SQL to track delivery progress and resolve functional issues.

Société Générale

January 2013 – January 2016

Senior Process Analyst

Bangalore, India

- Managed end-to-end FX and Money Market trade lifecycle including confirmations settlements and payment instructions across trading operations.
- Resolved trade breaks and operational exceptions by coordinating with upstream and downstream teams across global markets operations.
- Supported onboarding of new trading products and clients through static data configuration and operational readiness coordination.
- Improved operational efficiency by identifying root causes of settlement failures and implementing corrective workflow adjustments.

Royal Bank of Scotland

January 2010 – January 2013

Process Analyst

Chennai, India

- Processed FX and derivative trades using SWIFT MT3XX and MT6XX messaging ensuring regulatory compliance and contract accuracy.
- Handled confirmations for structured products including FX options dual currency deposits and barrier instruments across treasury operations.
- Prepared operational performance reports and financial deal analysis supporting management decision making.
- Maintained trade processing accuracy by validating transaction details and resolving reconciliation discrepancies across settlement systems.

Education

Ramakrishna Mission Vivekananda College - University of Madras

May 2007 – April 2010

Bachelor of Business Administration

Chennai, India

Certifications

- Agile Master Certification

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Working Proficiency (B1)
