Summary

Data Scientist with 4.5 years of experience in NLP, LLMs, and predictive modeling across product and analytics environments. Strong expertise in building end-to-end machine learning pipelines, applying transformer-based models, and generating actionable insights using data. Proven ability to translate business problems into scalable data solutions using Python, SQL, and BI tools. Experience in recommendation systems, sentiment analysis, and customer segmentation.

Core Skills

- **Machine Learning & NLP:** NLP, Sentiment Analysis, Classification, Regression, Recommendation Systems, LLM, RAG
- **Programming:** Python, R, SQL
- **Data & BI Tools:** Power BI, Excel, MySQL, Jupyter Notebook, Google Colab
- **Frameworks & Libraries:** Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, Hugging Face
- **Deployment & Tools:** Streamlit, AWS, Postman, Jira

Experience

Networth Corp

April 2025 – October 2025

Data Scientist

Bengaluru, India

- Segment 20K insurance customers using PCA and K-Means clustering, identifying 4 behavioral and risk-based segments for targeted pricing strategies.
- Engineer 15+ risk features including loss ratio and claim frequency to improve customer profiling and model accuracy.
- Reduce feature dimensionality by 60% using PCA, improving clustering performance and interpretability.
- Generate insights for pricing and retention strategies, contributing to potential loss ratio reduction of 12%.

CloudBloom Systems

December 2024 – April 2025

Data Scientist

Bengaluru, India

- Develop recommendation engine for LMS platform using ranking algorithms, improving course discovery and user engagement.
- Increase course completion rates by 15% through personalized recommendation strategies.
- Build data pipeline integrating AWS data sources with Power BI for automated reporting and analytics.
- Design interactive dashboards to visualize user behavior and business metrics, improving decision-making and increasing referrals by 5%.
- Leverage cloud and BI tools to deliver scalable, data-driven insights for business growth.

Riverdale Software Solutions

September 2018 – January 2022

Software Developer

Bengaluru, India

- Develop NLP-based document summarization system using transformer models including BERT, BART, and T5, selecting optimal models through comparative evaluation.
- Evaluate model performance using ROUGE and BERT Score metrics to ensure high-quality summarization output.
- Build sentiment analysis model using Hugging Face transformers and zero-shot learning for customer review classification.
- Design and deploy Streamlit-based interface enabling users to upload documents and generate automated summaries.
- Build regression models using Random Forest and Gradient Boosting on 6000+ records, improving prediction accuracy through feature engineering and ensemble methods.

Publications

- **Publication (Springer):** Document Processing and Summarization using Transformers Publication URL
Published in Springer, February 2026. Developed transformer-based NLP models (BERT, BART, T5, Gemini Flash) to generate simplified summaries from educational PDFs, improving accessibility for specially abled students. Evaluated models using ROUGE and BLEU metrics, enhancing summary quality and reducing manual effort for educators.

Education

REVA University	2022 – 2024
<i>Master of Business Administration in Business Analytics</i>	<i>Bengaluru, India</i>
Sir M Visvesvaraya Institute of Technology	2013 – 2017
<i>Bachelor of Engineering in Computer Science</i>	<i>Bengaluru, India</i>

Languages

- English – Full Professional Proficiency (C1)
