Dear Hiring Manager,

I am writing to express my interest in opportunities as a **Senior Scrum Master, SAFe Scrum Master, or Agile Delivery Manager** within your organization. With more than six years of experience leading Agile delivery across healthcare and enterprise technology programs, I have developed strong expertise in facilitating high-performing Scrum teams, improving delivery predictability, and driving Agile maturity within complex organizational environments.

In my current role at **Infosys**, I facilitate **Scrum ceremonies, guide sprint planning and backlog refinement, and coordinate cross-functional teams across development, QA, DevOps, and product management functions**. By implementing structured backlog refinement practices and velocity-based planning, I improved sprint planning accuracy and strengthened release predictability. I also support Agile Release Train alignment by managing dependencies, monitoring delivery metrics, and ensuring transparency across stakeholders and delivery teams.

Previously at **Concord One Technologies**, I played a key role in advancing Agile adoption by coaching teams on Scrum best practices and implementing structured delivery frameworks that improved Agile maturity and sprint discipline. I introduced release calendars and Scrum of Scrums governance to better manage cross-team dependencies and improve release visibility. My earlier experience in quality engineering and testing has given me a strong technical understanding of the software development lifecycle, which enables me to effectively collaborate with engineering teams and promote quality-driven delivery practices.

I am particularly interested in contributing to organizations in Germany that are embracing Agile transformation and scaling modern delivery frameworks across global technology programs. With certifications including **SAFe Agilist, Certified ScrumMaster, and Certified Scrum Product Owner**, along with hands-on experience in Agile governance, delivery metrics, and cross-team coordination, I am confident in my ability to support teams in delivering reliable, high-quality solutions.

I would welcome the opportunity to discuss how my experience in Agile leadership, delivery governance, and team coaching can contribute to the success of your organization. Thank you for your time and consideration.

Sincerely,

Subitchaya Balakrishnan
