Target Roles: Senior Scrum Master | SAFe Scrum Master | Agile Delivery Manager

Summary

SAFe 6.0 Agilist, CSM and CSPO certified Scrum Master with 6+ years of experience leading Agile delivery across healthcare and enterprise technology programs. Experienced in facilitating Scrum ceremonies, improving sprint predictability, managing cross-team dependencies, and driving Agile maturity within organizations. Proven ability to remove delivery impediments, align Product Owners and engineering teams, and implement data-driven Agile practices that improve velocity, release transparency, and stakeholder confidence. Strong foundation in SDLC, STLC, QA engineering, and regulated healthcare environments.

Core Skills

- **Agile Frameworks & Practices:** Advanced Scrum Knowledge, Lean and Agile Methodologies, Scrum Ceremonies, Kanban, Product Backlog Management, Continuous Improvement
- **Agile Leadership & Facilitation:** Coaching and Mentoring, Impediment Removal, Conflict Resolution, Change Management, Communication and Collaboration, Stakeholder Management
- **Delivery Governance & Metrics:** Agile Metrics and Reporting, Sprint Capacity Planning, Risk Management, Release Planning, Dependency Management
- **Engineering & Technical Tools:** Jenkins, Selenium, Zephyr Scale, Git, MongoDB, Tableau, Power BI
- **Communication Platforms:** Microsoft Teams, Slack, Zoom
- **Delivery Governance & Metrics:** Agile Metrics and Reporting, Risk Management, Project Management, Documentation and Reporting, Analytical and Problem Solving
- **Collaboration & Project Tools:** JIRA, Azure DevOps (ADO Board), Trello, Confluence, Miro, Mural, Scrum Poker Online, Open Source Online Retrospective Tools

Experience

Infosys Limited

August 2024 - January 2026

Senior Associate Consultant - Scrum Master

India

- Facilitate Agile ceremonies including Sprint Planning, Daily Scrum, Sprint Reviews, and Retrospectives to ensure team alignment, delivery transparency, and continuous improvement.
- Improve sprint planning accuracy by 20% through structured backlog refinement, clear acceptance criteria, and estimation using historical velocity trends.
- Enhance release predictability by 15% by monitoring burndown charts, velocity metrics, and defect trends to proactively identify and mitigate delivery risks.
- Coordinate cross-functional teams including development, QA, DevOps, and product management to resolve dependencies, remove impediments, and ensure enterprise release readiness.
- Manage sprint capacity planning by tracking team availability, resource utilization, and velocity trends to align delivery commitments with Agile Release Train (ART) objectives.

Concord One Technologies

March 2020 - May 2024

Senior Engineer QE and Scrum Master

India

- Increase Agile maturity by 25% by conducting delivery gap assessments and implementing structured coaching frameworks focused on accountability, sprint discipline, and sustainable velocity improvement.
- Improve backlog quality and story acceptance rate by 30% through structured refinement workshops, clear acceptance criteria definition, and close alignment with Product and Delivery Managers.
- Enhance cross-functional integration and release transparency by introducing a structured release calendar and facilitating Scrum of Scrums governance for dependency and risk alignment.

- Reduce defect leakage by 20% by validating AI and ML driven healthcare workflows in collaboration with QA and Product Owners while promoting Continuous Integration and Test Driven Development practices.

Auxo Technology Labs

December 2018 - March 2020

QA Engineer

India

- Design and implement comprehensive test strategies across functional, regression, non-functional, and performance domains to ensure release stability throughout the software development lifecycle.
- Strengthen defect prevention and quality governance by establishing standardized quality gates, detailed test plans, and early lifecycle validation controls across development phases.
- Improve product reliability by collaborating with architects, developers, and product owners to translate business requirements into traceable test cases supported by structured defect tracking and root cause analysis.
- Enhance cross-functional release coordination by partnering with development and QA teams to monitor defect trends, prioritize fixes, and ensure production readiness before deployment.

Siglap IT Solutions

January 2016 - December 2018

Software Engineer Testing

India

- Design structured test plans and protocols aligned with SRS documentation and business requirements to ensure full requirement traceability and coverage.
- Improve regression stability by 20% through systematic defect tracking, root cause analysis, and structured validation frameworks across client-server applications.
- Increase automation readiness by defining reusable test specifications and structured test cases to support automated script development.
- Strengthen release quality by executing functional, usability, performance, and regression testing while collaborating with Business Analysts and Project Managers to validate acceptance criteria.

Education

St.Peters Engineering College

August 2007 - November 2011

Bachelor of Biomedical Engineering

India

Certifications

- SAlFe 6 Agilist – Scaled Agile
- Certified ScrumMaster (CSM) – Scrum Alliance
- Certified Scrum Product Owner (CSPO) – Scrum Alliance
- Agile Scrum Master (ASM) – Simplilearn
- Master's Program in Automation Testing – Simplilearn
- AI for Scrum Masters – Udemy
- Modern Project Manager 2026: Agile, Scrum & Generative AI – Udemy
- Power BI – Business Intelligence – Udemy
- Tableau Certification Training – Udemy

Languages

- English - Full Professional Proficiency (C2)
- German - Intermediate Proficiency (B1)
