Dear Hiring Manager,

I am writing to apply for the Senior Associate – Liquidity Risk & Regulatory Reporting position. With over ten years of experience in asset management and global banking operations, I bring extensive expertise in regulatory liquidity reporting, governance controls, and end-to-end submission ownership under strict supervisory timelines.

In my current role within the Liquidity Data Measurement and Reporting function at Deutsche Bank Group, I prepare and submit key liquidity metrics including ALMM, NSFR, and LCR under the Basel III framework. My scope covers internal liquidity risk analytics, variance investigation, regulatory interpretation alignment, and submission readiness with senior stakeholder sign-off. I deliver reporting across daily to quarterly cycles while maintaining robust compliance controls and audit standards.

I also lead the annual EBA Funding Plan submission to the Bundesbank under PRISMA guidelines, ensuring data integrity and consistent regulatory treatment in close coordination with Treasury, Performance & Planning, and Finance functions. Additionally, I oversee key daily monitoring metrics including Unsecured Wholesale Funding (USF), Divisional Stress Contribution (DSC), single counterparty concentration risk, and RBI-mandated India LCR reporting.

Alongside technical ownership, I support junior team development to ensure reporting continuity and governance stability. My approach is structured and execution oriented, with a strong emphasis on documentation discipline, control integrity and timely delivery in environments subject to heightened regulatory scrutiny. I communicate effectively across senior management and cross-functional stakeholders.

I am keen to contribute as a Senior Associate, taking full accountability for regulatory deliverables, enhancing liquidity governance, and driving continuous process optimization within Germany-based risk functions. I welcome the opportunity to discuss how my experience can support your liquidity risk team.

Yours sincerely,
Sneha Jhamvar
