Dear Hiring Manager,

I am writing to express my interest in **Program Management or Project Management** opportunities within your organization. With over ten years of experience delivering enterprise digital, analytics, and technology initiatives across consulting and healthcare technology environments, I bring a strong background in program governance, Agile delivery frameworks, and cross-functional team leadership.

In my current role at **Deloitte**, I lead **complex digital and analytics programs within the Digital Data Analytics Innovation team**. I manage multiple large-scale initiatives simultaneously while overseeing end-to-end project execution using **hybrid delivery models combining Agile, Scrum, and Waterfall methodologies**. I have also led Agile transformation initiatives and trained more than three hundred professionals on Agile and Scrum practices, helping improve delivery efficiency and strengthen organizational adoption of modern delivery frameworks. My responsibilities include program governance, financial planning, stakeholder coordination, and implementation of structured risk management frameworks aligned with PMBOK standards.

Previously, I worked with **Oracle** as a **PMO Consultant** supporting clinical trial technology programs for **global pharmaceutical clients** such as **Novo Nordisk, GSK, and Merck**. In this role, I coordinated project execution across study setup, testing, and maintenance phases while collaborating closely with clinical operations and data management teams. My work involved managing schedules, overseeing milestone tracking, coordinating development and QA teams, and handling change requests related to protocol amendments and system configuration updates.

Earlier in my career, I gained foundational project delivery experience in infrastructure programs where I supported project planning, resource coordination, feasibility analysis, and regulatory compliance activities. This experience helped me develop a strong understanding of structured project planning, risk assessment, and operational coordination across multidisciplinary teams.

I am a **certified Project Management Professional (PMP)** with additional certifications in Agile delivery and Scrum practices. My academic background includes an MBA along with ongoing postgraduate studies in Artificial Intelligence and Machine Learning. This combination of project leadership, technical understanding, and continuous learning enables me to contribute effectively to organizations delivering complex technology and digital transformation programs.

I am particularly interested in opportunities in Germany and look forward to contributing my experience in program governance, Agile delivery leadership, and enterprise project execution within globally collaborative teams.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my experience and leadership capabilities can contribute to your organization's objectives.

Sincerely,

Shubham Prakash
