Summary

Machine Learning Engineer with 9+ years across research and enterprise delivery, specializing in Generative AI, LLM applications, and production ML systems. Built RAG based chatbots, multi agent assistants, and AI analytics solutions with deployment ownership in cloud and container environments. Strong Python engineering foundation with MLOps, data pipelines, and stakeholder facing delivery. Open to Germany based roles in GenAI and ML engineering.

Core Skills

- **Machine Learning & AI:** Machine Learning, Predictive Modeling, Statistical Modeling, Optimization Algorithms, Supervised Learning, Unsupervised Learning, Ensemble Models, Hybrid Models
- **Data Engineering & Databases:** SQL, PostgreSQL, Oracle (PL/SQL), MongoDB, ETL Pipelines, FAISS, ChromaDB, PGVector
- **Cloud, DevOps & MLOps:** AWS, OpenShift, PCF, Docker, Jenkins, CI/CD, Git
- **Programming & Backend:** Python, Java, React (Basic), FastAPI, Spring Boot, REST APIs
- **Data Analysis, Testing & Observability:** Exploratory Data Analysis (EDA), Feature Engineering, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Tableau, Cypress, SonarQube, Checkmarx, New Relic, Splunk, Dynatrace, APM Monitoring, Log Analytics
- **Generative AI & NLP:** Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, Agentic AI, Multi-Agent Systems, Text Preprocessing, Transformers, Sentiment Analysis, Text Summarization, Named Entity Recognition (NER), Topic Modeling, Speech Processing

Experience

Endava

January 2024 – Present

Senior Developer / Machine Learning Engineer

Bangalore, India

- Lead development of enterprise Generative AI and multi-agent systems across internal POCs and client engagements by designing LLM-driven architectures and guiding implementation teams.
- Designed an AI-powered product comparison and SKU recommendation platform for Johnson & Johnson using RAG pipelines, structured data integration, and LLM reasoning improving product matching accuracy by 25%.
- Delivered an end-to-end AI Companion multi-agent chatbot using LangChain orchestration, Redis caching, vector databases, and FastAPI while managing deployment, server configuration, and troubleshooting.
- Delivered a production-ready AI validation platform for Cigna using Databricks, PySpark, and OpenShift after rapid platform upskilling enabling scalable data validation workflows.
- Enabled AI adoption for enterprise teams by developing workflow-identification assistants, delivering technical documentation, conducting AI training sessions, and supporting client-facing demonstrations.

GalaxE Solutions (Endava)

July 2021 – December 2023

Developer / Machine Learning Engineer

Bangalore, India

- Developed end-to-end machine learning solutions for healthcare analytics by implementing data pipelines, feature engineering workflows, predictive models, and visualization dashboards.
- Migrated 300+ enterprise applications from PCF to AWS and OpenShift environments improving infrastructure scalability, reliability, and operational efficiency.
- Built predictive machine learning models for sprint velocity forecasting and operational analytics using Python-based ML frameworks and enterprise datasets.
- Implemented ETL pipelines and automated data validation workflows using Python and Apache Flink improving data quality and reducing manual reconciliation efforts by 30%.
- Resolved complex AST and graph-based reasoning challenges enabling automated React code generation from user stories in an AI-driven SDLC system.

- Delivered undergraduate courses in Big Data Analytics and Database Management Systems through lectures, lab sessions, and structured curriculum delivery.
- Led innovation and student development initiatives as departmental coordinator supporting interdisciplinary technical projects and applied research activities.
- Mentored student research projects in clinical data mining and machine learning including experiment design, model evaluation, and research documentation.

Education

Purdue University (in collaboration with IBM) – Simplilearn

2020 – 2021

Post Graduate Program in Artificial Intelligence & Machine Learning

Chennai, India

College of Engineering Guindy, Anna University

2015 – 2020

Doctor of Philosophy (PhD) in Information & Communication Engineering

Chennai, India

College of Engineering Guindy, Anna University

2013 – 2015

Master of Technology (M.Tech) in Information Technology

Chennai, India

College of Engineering Guindy, Anna University

2009 – 2013

Bachelor of Technology (B.Tech) in Information Technology

Chennai, India

Certifications

- Applied Generative AI Specialization (2024)
- Post Graduate Program – Artificial Intelligence & Machine Learning (2020 - 2021)

Publications

- **Feature Selection using Competitive Coevolution of Bio-inspired Algorithms for the Diagnosis of Pulmonary Emphysema** (2022)
- **Classification Framework for Clinical Datasets using Synergistic Firefly Optimization** (2021)
- **Computer-Assisted Medical Decision-Making System using Genetic Algorithm and ELM for Allergic Rhinitis Diagnosis** (2020)
- **Evaluation of Parameter Settings for Training Neural Network with Backpropagation: A Clinical Dataset Study** (2020)
- **Feature and Instance Selection using Co-operative Co-evolution and Random Forest** (2020)
- **Correlation-Based Ensemble Feature Selection and Backpropagation Neural Network Classification** (2019)
- **Patent: Gravitational Potential Energy Propelled Novel Power Generator** (India Patent Office, Application No. 1430/CHE/2012 A)

Languages

- English – Full Professional Proficiency (C1)
- German – Intermediate Working Proficiency (B1)
