Dear Hiring Manager,

I am writing to express my interest in **food safety or quality assurance** opportunities within your organization. With 9 years of experience in food manufacturing, airline catering, and quick service restaurant environments, I have developed strong expertise in implementing food safety management systems, regulatory compliance, and operational quality control across large-scale production and distribution networks.

In my current role as **Quality Assurance Manager at Fasta Pizza Pvt Ltd.**, I established the company's first **HACCP and FSMS framework aligned with FSSAI and international standards**. I lead quality assurance operations including hygiene audits, process verification, documentation control, and regulatory audit preparation. I also collaborated with operations and supply chain teams to strengthen cold-chain management, implement hygienic facility design principles, and improve overall compliance with structured quality systems.

Previously, at **iD Fresh Food India Pvt Ltd.**, I played a key role in launching new product lines and implementing HACCP and FSMS frameworks for high-volume manufacturing operations. My responsibilities included monitoring distribution quality across India and GCC markets, conducting cold-chain validation trials, and implementing corrective action systems that significantly reduced customer complaints.

Earlier in my career, I gained extensive experience in **airline catering environments at Sky Gourmet Catering and Lulu Flight Kitchen**, where I supported international airline audits, conducted microbiological testing, and ensured compliance with global standards including **ISO 22000, HALAL, and IATA** food safety requirements. These roles strengthened my experience in audit readiness, supplier verification, hygiene program management, and CAPA implementation.

I am particularly interested in opportunities in Germany where organizations prioritize strict food safety governance, international quality standards, and operational excellence within food manufacturing and catering environments. With my background in HACCP-based systems, audit management, and cross-functional collaboration, I am confident in contributing effectively to high-standard quality and compliance programs.

I would welcome the opportunity to discuss how my experience in food safety systems, regulatory compliance, and operational quality management can support your organization's quality and safety objectives.

Thank you for your time and consideration.

Sincerely,

Arjun Panchaman
