Dear Hiring Manager,

I am writing to express my interest in the IT Support Engineer / System Administrator position within your organization. With over three years of experience in enterprise IT support, endpoint management, and Microsoft 365 administration, I bring a strong technical foundation combined with a customer-focused approach to service delivery.

Currently, I am working as a Desktop Engineer at OptimizeRCM, where I provide L1/L2 technical support across Windows, Linux, and macOS environments in a global, SLA-driven ecosystem. My responsibilities include Microsoft 365 administration, Active Directory provisioning, VPN troubleshooting, hardware diagnostics, and IT asset lifecycle management. I consistently maintain high SLA adherence while resolving complex incidents efficiently and documenting root cause analyses to reduce recurring issues.

Previously, at Firstsource Solutions Ltd, I supported telecom enterprise clients across North America, EMEA, CALA, and APAC regions. I diagnosed server hardware faults, managed secure customer environments, and improved first-call resolution rates while maintaining strict compliance with data security policies. Supporting global clients such as AT&T, Verizon, and Bell Canada strengthened my ability to work in multicultural environments and communicate technical solutions clearly and professionally.

I hold Microsoft 365 Administrator (MS-102) certification along with Red Hat system administration training (RHCSA/RHCE – Basic to Intermediate). I am particularly interested in opportunities in Germany, where I can contribute to structured IT environments that value reliability, compliance, and continuous improvement. Additionally, I am developing my German language skills (B1 level) to integrate effectively into the local work culture.

I am highly motivated, adaptable, and committed to maintaining secure and stable IT infrastructure. I would welcome the opportunity to contribute my technical expertise and problem-solving skills to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how I can add value to your organization.

Yours sincerely,

Avinash S
