Hiring Manager,

I am applying for Enterprise Engagement Manager and Service Delivery leadership roles in Germany. I bring 20+ years of experience leading global delivery for enterprise clients across digital commerce and platform programs, including build and run (AMS) operating models. I have owned governance, escalations, and commercial performance while partnering with senior stakeholders to deliver predictable outcomes across complex, multi-stream portfolios.

In my current role at Capgemini supporting L'Oréal Europe, I lead end-to-end engagement outcomes across delivery, operations, and account governance. I run executive cadences such as steering committees and QBR/MBR forums, drive SLA and KPI performance through ITIL incident, change, and problem management, and maintain disciplined RAID and change control to reduce delivery risk. I coordinate across distributed teams and multiple vendors, aligning release readiness and operational stability with business priorities.

I also bring strong commercial and execution discipline. Across engagements, I have managed resource and demand planning, protected margin through SOW and contract governance, and shaped solutions through RFP leadership for POS and CRM programs. I stay hands-on with delivery methods across Agile, SAFe, and hybrid models, and I apply AI-enabled practices such as Copilot and automation to improve reporting speed and insight quality while strengthening service reliability.

Germany appeals to me for its strong engineering culture and focus on operational excellence. I work effectively across international stakeholders and cross-cultural teams, and I value clear governance, measurable outcomes, and high ownership. I would welcome the opportunity to discuss how my engagement leadership, ITIL-based service delivery, and enterprise commerce background can help your organization strengthen delivery performance, customer outcomes, and account growth.

Sincerely,
Sateesh Muggalla
