Dear Hiring Manager,

I am writing to express my interest in the **SAP VIM OpenText / SAP FI Consultant** role within your organization. With close to 10 years of experience in SAP consulting, including full lifecycle implementations, rollouts, support, and post-go-live stabilization, I bring strong techno-functional expertise in SAP OpenText Vendor Invoice Management (VIM) and SAP FI modules.

Currently working as a **Senior Consultant at Cognizant**, supporting incident management, VIM enhancements, and continuous improvements. Possess extensive hands-on experience implementing SAP OpenText VIM, OpenText BCC (ICC), OpenText Enterprise Scan, OpenText Archive Server, and the Easy Invoice plugin across SAP ECC and S/4 HANA environments. Responsibilities include configuration, third-party integrations, testing, user training, and post-go-live support.

Previously at **Capgemini and Accenture**, I worked on multiple rollout and end-to-end implementation projects. I have configured Archive Link, VIM Document Types, Process Types, Process Options, enhanced indexing screens, and implemented approval workflows for PO, Non-PO, Down Payment, and Freight invoices. I also have experience in logic modules to determine index screen fields and managing FI integration with VIM solutions. My project involvement covered requirement gathering, configuration design documentation, cutover planning, defect management, UAT coordination, and hypercare support.

In addition to VIM, I possess strong SAP FI configuration expertise in GL, AP, AR, Taxation, Financial Statement Versions, and Automatic Payment Program. I have conducted comprehensive testing (Unit, QA, Integration, UAT), delivered end-user training, prepared functional specifications, and ensured compliance with quality processes. My exposure to SAP Solution Manager and incident management tools has strengthened my ability to deliver timely and effective solutions.

I am **SAP Certified (SAP Certified Application Associate – Financial Accounting with SAP ERP 6.0)**. My analytical mindset, structured communication style, and ability to collaborate across cross-functional teams enable me to drive successful project outcomes while maintaining strong stakeholder relationships.

I am confident that my experience in SAP VIM implementations, enhancements, rollouts, configurations, and support engagements makes me a strong fit for this role. I look forward to the opportunity to contribute to your organization's SAP transformation initiatives.

Thank you for your time and consideration.

Sincerely,

Shraddha Jadhav
